

Model	MIX 120R
Fuel type	<i>WOOD-GAS BURNING OVEN</i>
Type	Rotary oven

Specifications.

Number of pizzas 30 cm.	9
Productivity per hour.	135
Consumption of firewood per hour /kg./	5-6
Weight / kg /.	1950
Gas consumption:	
-methane gas mc / h	3.3
-GPL gas kg / h	1.9
Gas pressure:	
G30-31	37mbar
G20	20mbar
Gas nozzle	3 / 4 "
Thermal power / kw /	26
Electrical supply-230 V/50-60 Hz	

Pizza oven wood-gas burning series MIX-R.

This is a wood-gas oven with two front doors a rotating basis, wood combustion chamber, separated from the baking surface and drawer to collect ashes from burning wood. By rotation of the base of the baking chamber a more uniformed performance, a higher productivity and better work conditions are achieved, since a pizza peel with a shorter handle is used. The rotation speed can be gradually increased and can be reversed as well. Heating up is done by an ecological burner, which works with methane or propane-butane. The power of the burner can be changed by an electronic modulator in the range of 5 to 100 per cents. Baking temperature control is electronic with digital indication. Electrical supply is 230 Volt/50-60 Herz.

***Dimensions are cm.
